CONTENTS

Selected Papers from the 13th MPA-Seminar, held on October 8 and 9, 1987, in Stuttgart, Fed. Rep. Germany

Preface, *K. Kussmaul* ix

On the transferability of fracture mechanics parameters from specimens to structures using FEM, *W. Brocks, G. Künecke, H.-D. Noack and H. Veith* 1

Prediction of large specimen fracture toughness from small specimen tests, *Y. Tanaka, K. Suzuki and T. Iwadate* 15

The influence of triaxiality on stable crack growth, *H. Kordisch, E. Sommer and W. Schmitt* 27

Characteristic experimental data for evaluating the fracture toughness of impact loaded medium-scale-specimens, *K.E. Becker, H.D. Joas, A.R. Meyer and Kh. G. Schmitt-Thomas* 37

An attempt to explain strength increase due to high loading rates, *J. Eibl and M. Curbach* 45

Progress in numerical modelling of dynamic specimen behaviour in the LDTF, *P.M. Jones, F. Casadei and J.P. Halleux* 51

Recent developments and results of LDTF tests on steel and concrete specimens, *C. Delzano, E. Gutierrez, P.M. Jones and G. Verzeletti* 65

The history, development and application of a uniformly applied load wide plate testing machine, *A. Quirk and E. Bevitt* 81

Load bearing and deformation behaviour of dynamically loaded wide plate specimens, *P. Julisch, H.-J. Hädrich, W. Stadtmüller and D. Sturm* 93

Phased array concept for the ultrasonic inservice inspection of the spherical bottom of BWR pressure vessels, *G. Brekow, H. Wüstenberg, W. Möhrle and E. Schulz* 105

Evaluation of ultrasonic volume- and underclad indications at long distances, *W. Gebhardt, V. Schmitz, L. von Bernus and M. Kröning* 115

Manual and mechanized ultrasonic inspection of large components in respect of flaw estimation by fracture mechanics, *D. Heinrich, K.-H. Mayer, G. Müller and W. Prestel* 127

A fracture mechanics interpretation of acoustic emission results, *G.E. Neubrech, F. Walte, E. Waschkies and M. Klein* 139

The consideration of irradiation embrittlement of RPV steels in German licensing rules as compared to recent results of irradiation experiments, *J. Ahlf, D. Bellmann, F.J. Schmitt and G. Pott* 155

B & W owners group reactor vessel integrity program – The first ten years, *A.L. Lowe, Jr., K.E. Moore and L.B. Gross* 165

Crack behaviour of pipes under internal pressure and simultaneous external bending moment, *W. Stoppler, J. Schiedermaier, K. Hippelein, D. Sturm and S. Shen* 173

Assessment of large scale pipe tests by fracture mechanics approximation procedures with regard to leak-before-break, *E. Roos, K.-H. Herter, P. Julisch, G. Barholomé and G. Senski* 183
Failure behavior of a pipe system with a circumferentially orientated flaw – Analytical and experimental investigations, *T.P.J. Mikkola, H. Diem, D. Blind and H. Hunger* 197
Fracture mechanics analysis of a pipe elbow, *A. Sauter, K. Turan, K. Kerkhof and G. Wagemann* 211
Material compatibility during the chemical cleaning of steam generators with chelating solutions, *B. Stellwag and S. Odar* 221
Valve testing and development in the laboratories of the KWU group of Siemens AG, *U. Simon and B. Dernbach* 229
Shafts of main coolant pumps – Failure analysis and remedies, *R. Loehberg, W. Ullrich and K. Gaffel* 243
Some current issues in the PTS research, *A. Jovanović, A. Sauter and A.C. Lucia* 259
Multiaxial creep of tubes from Incoloy 800 H and Inconel 617 under static and cyclic loading conditions, *H.-J. Penkalla, H. Nickel and F. Schubert* 279
Experimental and theoretical investigations of creep buckling on NiCr 22 Co 12 Mo tubes at 950 °C, *F. Schubert, K. Ahmed, G. Breitbach and H. Nickel* 291
Verification of the analysis for fracture behaviour estimation of pressure vessels, *H. Rintamaa, H. Keinanen, K. Törrönen, H. Talja, A. Saarenheimo and K. Ikonen* 299
MINERVA, qualification of dissimilar welds for HTR-application, *B. Baumann, G. Gnirss, H. Neureuther and K. Schneider* 311
J_R-curves of wide plates and CT25 specimens – Comparison of the results of a pressure vessel, *D. Aurich, K. Wobst and H. Krafka* 319
Inconel X-750 as material for core internals and core components – Status of in-service experience and replacements at Siemens KWU Group, *H. Rubel, D. Marschke, J. Tautz and G. Micheel* 329
A contribution to the numerical and experimental determination of residual stresses in welds, *K. Kussmaul, E. Roos, W. Guth and J. Szimmat* 337
